

## AeroTect Door Cup Guards Installation Instructions

<u>Contents included:</u>	<u>Other Items you will need:</u>
Door Cup Guards Squeegee	spray bottle with 1 part rubbing alcohol to 15 parts water Detailing cloth

**Thank you for choosing AeroTect® brand Products. If you have any question about your installation, please call us at (909) 596-0053 or e-mail us at [info@erotect.net](mailto:info@erotect.net).**

1. Clean area thoroughly before installation. Prop open door handle, if possible, to maximize work space.
2. Spray door cup and Door Cup Guard with water/alcohol solution. Position piece in door cup. Use your thumb to tack down one corner of the Door Cup Guard. Lightly stretch the film to the opposite corner and tack down.  
  
Tip: it may help to prop your door handle open with something
3. Continue tacking down the remaining corners. Use the squeegee and work slowly so the film does not bunch up. Be sure to squeegee all of the water out from under the film.
4. Use your detailing cloth to dry the edges of the film.
